美國伊利諾大學香檳校區

Illinois, USA

Abstract

The rapid infusion of technology, particularly Artificial Intelligence (AI), has reshaped education, challenging the preservation of soft skills in the digital era. Balancing virtual and real-world interactions is critical. The evolution of technology, marked by AI advancements, poses an unprecedented challenge for education, emphasizing the importance of both hard and soft skills. As we navigate this transformative era, integrating digital transformations into teaching becomes crucial, influencing the landscape of education and shaping methods for an uncertain future.

Time: 4/12(五) 12:00~13:00

Location: 工一館E134室
